ENVIRONMENTAL POLICY

Environmental stewardship is a core value of Neptune Bulk Terminals (Canada) Ltd. Neptune recognizes that environmental excellence is integral to our long-term sustainability as a business.

To protect and enhance the environment, Neptune has adopted practices for demonstrating excellence and continuous improvement in environmental performance.

Neptune is committed to:

- The principles of pollution prevention, conservation and sustainability;
- Using resources efficiently and effectively;
- Demonstrating care and respect for our surrounding community and communicating openly with our stakeholders;
- Maintaining an Environmental Management System to support excellence which includes:
 - Continuous environmental improvement activities by reviewing environmental objectives, setting targets, measuring performance and implementing change to meet, and where practical exceed, all applicable environmental statutory and regulatory requirements;
 - Monitoring our performance through internal and external audits;
 - Reporting environmental performance to the Board of Directors, employees, regulatory authorities and other stakeholders; and
 - Providing a high level of employee and contractor training to ensure responsible work practices.

Neptune will review this policy annually to ensure that it reflects our ongoing commitment to environmental stewardship.
