

Electrical Superintendent

Location: North Vancouver, BC

Neptune Terminals is one of the largest multi-product bulk terminals in North America. The company has been in operation in the Port of Vancouver since 1968, and handles Canadian potash and steelmaking coal for export to markets around the world including Asia, Europe and South America. Neptune is part of a highly efficient supply chain that transports commodities from mine to port via Canadian railways. As part of this system, the company contributes significantly to the prosperity of Western Canada, supporting local communities and economic growth. The terminal currently has the capacity to handle 23.5 million metric tonnes annually, which will increase to more than 30 million tonnes annually due to terminal upgrades and other infrastructure improvements currently in progress. More information on the company, its operations and commitments to safety, environment and community are available at www.neptuneterminals.com.

The Electrical Superintendent is a key member of the team responsible for maintaining Neptune's bulk handling systems including railcar dumpers, stacker reclaimers, portal reclaimer, and shiploaders. He or she actively manages all electrical components of the system through planned maintenance, significant repairs, equipment breakdowns and special projects.

The ideal candidate will demonstrate excellence in safety performance, leadership, supervision and have experience in material bulk loading/unloading in a waterfront, mining, heavy industry, or similar operation. Ideally an Electrical Engineer, they may also be a technologist/technician or ticketed in an electrical trade. The candidate is to demonstrate knowledge and involvement in electrical systems ranging from 69kV substations, PLC programming, VFDs, HMI interfaces, through to networking and communication systems. Essential to this role is experience managing unionized crews, consultants and long-term contractors; the ability to multi-task and manage multiple concurrent projects; and the ability to evaluate the long-term operational and financial impact of maintenance decisions.

Neptune is a leading employer on the waterfront and prioritizes care for employees and community members, health and safety, and environmental protection. It offers very competitive compensation relative to many industries, and a strong benefits package including a defined benefit pension. This role will appeal to electrical maintenance professionals who love working with large industrial equipment in a busy operating environment.

Candidates will undergo a thorough employment assessment including formalized testing, interviews and reference checks. The successful applicant(s) will also be required, as a condition of employment, to undergo an independent Company sponsored medical examination. Join a winning team and send your resume by March 29, 2019 to:
